

We are looking for engineering services on a contract or as needed basis. Our firm designs, manufactures and sells rooftop equipment screens and solar mounting systems for commercial buildings. Please feel free to check out our websites roofscreen.com and silverbacksolar.com to learn more about us.

We are based in Santa Cruz, CA, but our customers are nationwide. When we design a solution for a customer, we provide project specific engineering calculations and construction drawings. As our business expands, we are seeking to build relationships with contract engineers in all 50 states to provide the stamped calc's and drawings. We've been engineering projects for a long time and we have it down to a science. We have licensed engineers on staff who know how to communicate the project parameters to you in a succinct manner, engineer to engineer.

We need an independent licensed Civil and/or Structural Engineers with experience in structural analysis of construction projects. Home office and moonlighting arrangements with low overhead are ideal. The work product needed will typically include a cover page, a layout plan, section details, assembly details and a calc package. We expect that you should be able to complete these projects within 10-20 hours. Fast turnaround is very important and we would typically expect a project to be done in 1 to 2 weeks.

We have an immediate need for a licensed Structural Engineer so please contact us if you meet these requirements. Forward your resume and cover letter to njones@roofscreen.com.
