

Attention Water Utility and Hydraulic Engineers Fire Protection, Refinery and Process Engineers!

Pipe2010: KYPipe/Surge Training Courses: Dr. Don J. Wood, Instructor December 9 – 10, 2010 in Baton Rouge, LA

Create a geo referenced map and data, keep records and do hydraulic modeling for your piping project. This widely used & proven software has a very simple and user friendly graphical user interface (GUI). Pipe2010 costs much less and does more than competitive software. Best yet, there is no annual cost for high-level technical support. The training is offered in 2 one-day sessions and users can sign up for 1 or 2 days.

Holiday Inn I-10 College Park
For reservations call (225) 448-2030

Day 1 - Pipe2010 : KYPipe Basic Training

Introduction to Modeling, Creating your geo referenced Water Utility or project map and data base, Providing operational data, running regular and EPS Hydraulic Simulations for Water Utilities, firewater systems, etc.

Day 2 - Surge2010: Surge Modeling (Waterhammer)

Introduction to Surge Modeling, Causes of Pressure Surges, Additional Data Requirements, Surge Control Devices (Air Valves, Surge Tanks, Relief Valves, etc), Sizing Surge Control Devices (Bladder Tanks, etc). There will be special presentations on problems and solutions of particular interest to Louisiana engineers.

Cost: 1 Day (\$400), 2 Days (\$700) **

****This special price** (30% discount) is made possible by our co-sponsors Pipe Tech and Charlotte US. (Regular price - \$595/ \$995)

Laptops required for work sessions. All participants will receive a free, fully-working, 50-pipe version of Pipe2010. It is not recommended to sign up for Day 2 unless you have taken Day 1 or are familiar with the Pipe2000 GUI

Each day provides 1 CEU or 8 PDH's
