

FTS is seeking a few Electrical Engineers with a minimum of four years of electrical design or related experience in high and medium voltage power generation, transmission, and distribution systems.

If you have a degree in Electrical Engineering, have passed your Fundamentals of Engineering or are already a licensed engineer, already possess basic (or more) experience in our field, and enjoy seeing projects designed from their inception through commissioning, then you are likely a fit for us.

**Responsibilities:**

- Develop electrical system studies, such as short circuit, load flow, protective device coordination, transient motor starting, harmonics, arc flash hazard, transient overvoltage, insulation coordination, and temporary overvoltage using industry standard software.
- Manage projects, coordinating the activities of other design professionals in multiples disciplines, maintaining direct client interactions, controlling cost budget and schedule for the companies contract and that of the larger client project, taking the leadership role for quality control on assigned projects.
- Provide technical support in the development of proposals, which will include application engineering, writing or equipment performance specifications, conceptual design and drawing development, and review of equipment quotations.

**Qualifications:**

- BS in Electrical Engineering from a US accredited college or university
- Possess an Engineer in Training certificate or are already licensed
- Minimum four years relevant experienced with electrical power systems
- Working knowledge of electrical power systems and protective relaying
- Willing to travel infrequently

**Preferred Qualifications:**

- All of the above AND
- Experienced in protection and control design, electrical systems studies, and development of relay setting for GE and SEL relays
- Experience with electric power transmission, distribution, and/or generation systems
- Experience being a part of project teams

This position is in Mississippi and we have one in Florida requiring 8yrs experience. We also have other EE position come up in Louisiana and Alabama with other requirements. Please send resume, desired location and salary to [tmacon@flexicrewtech.com](mailto:tmacon@flexicrewtech.com)
